introduction

OPEN FRAME begins with a simple gesture. An open space. A moment before things are defined.

This exhibition brings together photographers from around the world who approach the medium in very different ways. Some work with people, others with places, details, or ideas. Images can be direct or abstract, carefully composed or instinctive. Shot on film or digitally, each photograph carries its own rhythm and way of seeing.

There is no single narrative here. OPEN FRAME is about allowing photography to breathe. About looking without expectations, staying with an image a little longer, and recognizing how many directions the medium can take when it is given room to exist on its own terms.

Explore the online exhibition via the QR code below, and feel free to reach out to the photographers through the links provided if you'd like to purchase a print.
